SAFE - X

Introduction

Safe-X, A Business model developed by Safe Escrow company which allows trade transactions and Business Negotiations to be carried out on a fully secured Web3 decentralized platform called Block chain. Safe escrow is a business model that charges fee from every business transaction completed on the platform and uses same revenue generated to steadily skyrocket the price of the token.

Buying cryptocurrency transactions are irreversible, losing access to your funds can be a costly mistake. Unlike traditional banking systems, where transactions can be disputed or reversed, blockchain technology offers no such luxury. Therefore, top-notch CHANNEL is vital to provide a TRUSTLESS and SECURED means of transacting these digital assets.

Safe-X gives crypto users and businesses access to today's web-3 and decentralised global crypto infrastructure. Whether you're an established crypto business or simply exploring new possibilities, you can process a safe transaction in cryptocurrencies globally through a single integration—with fraud prevention and authorization optimization built in.

Opportunity

The cryptocurrency market has a limited track record in terms of data. Our success and sustainability are not only reliant in the crypto market.

What will set us apart from many other crypto projects is that our success is tied to daily and real world institutions, rather than the fluctuating market, in the case of safe-X, we would be using atleast 20% from revenue generated in escrow services to do global marketing, 50% share to all token holders monthly so everyone holder have passive income and also we would be putting some % of revenue generated from escrow as profit to staking pool.. so it's all round earning for safe-X investors

Safe-X Solutions

Safe-X is providing the FIRST TRUSTLESS DECENTRALISED HYBRID intermediary service in the crypto space to tackle the issue of theft and centralisation of peer - peer and OTC transactions between users and businesses that want to transact using cryptocurrencies

We also solve the issue of ANONYMOSITY as an ad-on benefit for our users

How it works

Definitions

- Safe-X: The blockchain web-3, decentralised escrow service provided by our company.
- User: Any individual or entity using the Safe-X service.
- Transaction: Any exchange of value between parties using Safe-X.
- Parties: The buyer and seller involved in a transaction using Safe-X.
- Escrow: A financial arrangement where a third party holds and regulates payment of the funds required for two parties involved in a given transaction. In this case, Safe-X is the smart contract that serves as escrow between parties.

Eligibility

As safe-X is fully decentralized parties using the escrow service must be legally capable of entering into binding contracts.

Services

- Safe-X is a smart contract fully audited to provide escrow service for online transactions and business negotiations
- The service is neutral, trustless, impartial, stable, and transparent.

Fees

- Users agree to pay the fees for the escrow service as specified on the Safe-X website.
- Fees are non-refundable unless otherwise stated.

Transaction Process

- The buyer and seller agree to use Safe-X for their transaction.
- Both parties sign up into the Safe-X escrow account to sign transaction.
- KYC is not needed
- Safe-X smart contract holds the funds automate after the sign transaction is completed and both parties are satisfied.
- Upon completion and satisfaction, Safe-X releases the funds to the seller, buyer or benefactor

Dispute Resolution

Safe-X doesn't requires a dispute resolution as both parties needs to sign the transaction either simultaneously or at different intervals before the smart contract can make implementation

Prohibited Activities

- Users agree not to use Safe-X for any illegal or unauthorized purpose.
- Users must not violate any laws in their jurisdiction.
- Users must not interfere with or disrupt the Safe-X service.

Indemnification

You agree to indemnify, defend, and hold harmless Safe-X and its affiliates from any claims, liabilities, damages, losses, and expenses arising out of or related to your use of the service.
